

General Education Course GenAI Acceptable Use Guidelines

Course Name: WFSC 140 - *Wildlife at the Movies*

Effective Date: 2026-08-21

Purpose: to establish clear boundaries for academic integrity while empowering them to ethically leverage AI as a tool for critical thinking, personalized learning, and innovative research.

Scope: includes enrolled students, academic advisors, graders, teaching assistants, and instructors to clarify the role of GenAI in this course and how learning is done and evaluated by others.

Key Definitions:

- AI-generated content: refers to any text, image, audio, video, or code that is autonomously created by Generative Artificial Intelligence (GenAI) models rather than by a human.
- AI-assisted content: refers to text, images, audio, or code created through a human-machine collaboration. Instead of the AI creating the piece autonomously, a human guides the AI to brainstorm, outline, draft, or polish the material, maintaining editorial control and creative direction throughout the process.
- Approved AI tool: All GenAI chatbots (i.e ChatGPT, Gemini, Claude)

Permitted Uses: GenAI may be used on all film reviews per the instructions, examples, and rubric. Other usage is not permitted.

Restricted Uses: GenAI may not be used for the discussions or signature assignments. Please see instructions, examples, and rubric for how usage is evaluated.

Disclosure Requirements: GenAI platform and usage must be referenced per course policy on Brightspace.
